02 Values

TRANSPARENCY

Baby Dogo is decentralized and supported by its community of enthusiasts. We encourage open communication and believe trust, transparency, and community are the 3 pillars to building longevity.

TRUST

In cryptocurrency market trust is paramount. That means full transparency not only in the community and development but also in security efforts. Baby Dogo has been audited by a third party dessert finance and has burned and locked majority of the LP tokens. No rug pulls here only cute Baby Dogos.

COMMUNITY

Baby Dogo is one of the fastest growing and most loved communities in crypto we believe that only together we are strong. Community is everything and Baby Dogo strives to include everyone from around the globe. We have multiple telegram channels dedicated to our international communities.

LONGEVITY

Baby Dogo is in for the long haul. The decentralized community is fostering and adopting long term development of the ecosystem and foundation in efforts to drive real use cases, and greater rewards beyond any temporary trends.

03 Baby Dogo Coin

Binance Smart Chain (BSC) was developed as a means of utilizing solidity-based smart contracts with much greater speed and efficiency than other, competing chains. With decentralized exchanges on BSC offering lightning-fast swaps and extremely low fees, BSC has started to become one of the most widely used blockchains for Decentralized Finance (Defi). BSC uses a token protocol developed by the BinanceTeam called BEP-20. Known for 5 second block speeds much faster than doge with 1 minute block speeds. These 2 articles compare block speed:

Doge 1 Minute:

Bep-20/BSC 5 seconds:

Advantages of the Binance smart chain are:

It's a sovereign blockchain, which will provide security and safety to all users and developers.

Its native dual chain interoperability will allow cross-chain communication and scaling of high-performance dApps that require a fast and smooth user experience. It's EVM-compatible and will support all of the existing Ethereum toolings along with faster and cheaper transactions.

Its on-chain governance with Proof of Staked Authority consensus, built on 21 validators who validate the transactions, will provide decentralization and enable significant community involvement.

Baby Dogo is not responsible for the actions of the Binance smart chain network

04 Ecosystem

Community-Powered

Baby Dogo is fully decentralized and owned by its fun, vibrant community. We welcome and embrace diverse perspectives to build Baby Dogo into the best community in crypto. With a do-good mission of helping save dogs in need.

Instant Rewards

For every transaction in the Baby Dodge network a 5% fee is distributed to existing holders. That means you earn more Baby Dogo just by holding it in your wallet. Watch your Baby Dogo grow every transaction!

Locked LP

Liquidity tokens are burned and locked. Additionally, 5% of all transaction fees are added to liquidity.

Here you can view LP holders:

05 Baby Dogo Protocol

Baby Dogo employs 3 simple functions: Reflection + LP acquisition + Burn. In each trade, the transaction is charged a 10% fee, which is split 2 ways.

5%

5% fee = redistributed to all existing holders

5%

5% fee is split 50/50 half of which is sold by the contract into BNB, while the other half of the BABY DOGO tokens are paired automatically with the previously mentioned BNB and added as a liquidity pair on Pancake Swap.

5%

30%+ of the total supply has been burned so far so 30%+ of the 5% redistributions are burned with every transaction

2.2%

We have a charity wallet with 2.2% of the total supply which receives redistributions to donate to our charity partners.
